Ministry Category: Ministry of Skill Development & Entrepreneurship
Problem Statement: Development of business Incubator platform   **Problem Code:** #MSD11
Team Leader Name: Arjun Kashyap   **College Code:** 1-3328566475

Description:
Ekyam (website) is the first of its kind website in nation that eliminates all the anomalies that an entrepreneur faces and furnishes various facilities required for a smooth startup foundation and access to various incubator services spread across the country in a decoupled manner.

We provide Business Incubation services to startups for accelerating their growth and success. The goal of the website that we are proposing is to provide an array of services that would support a growing business. It would comprise of services such as - office space, finance, technical services, mentorship, job seeking/advertising and networking. Shared work space in existing incubators results in an ideal environment for members, there is a better flow of ideas between the co working entrepreneurs. This system results in sharing of services and collaboration.
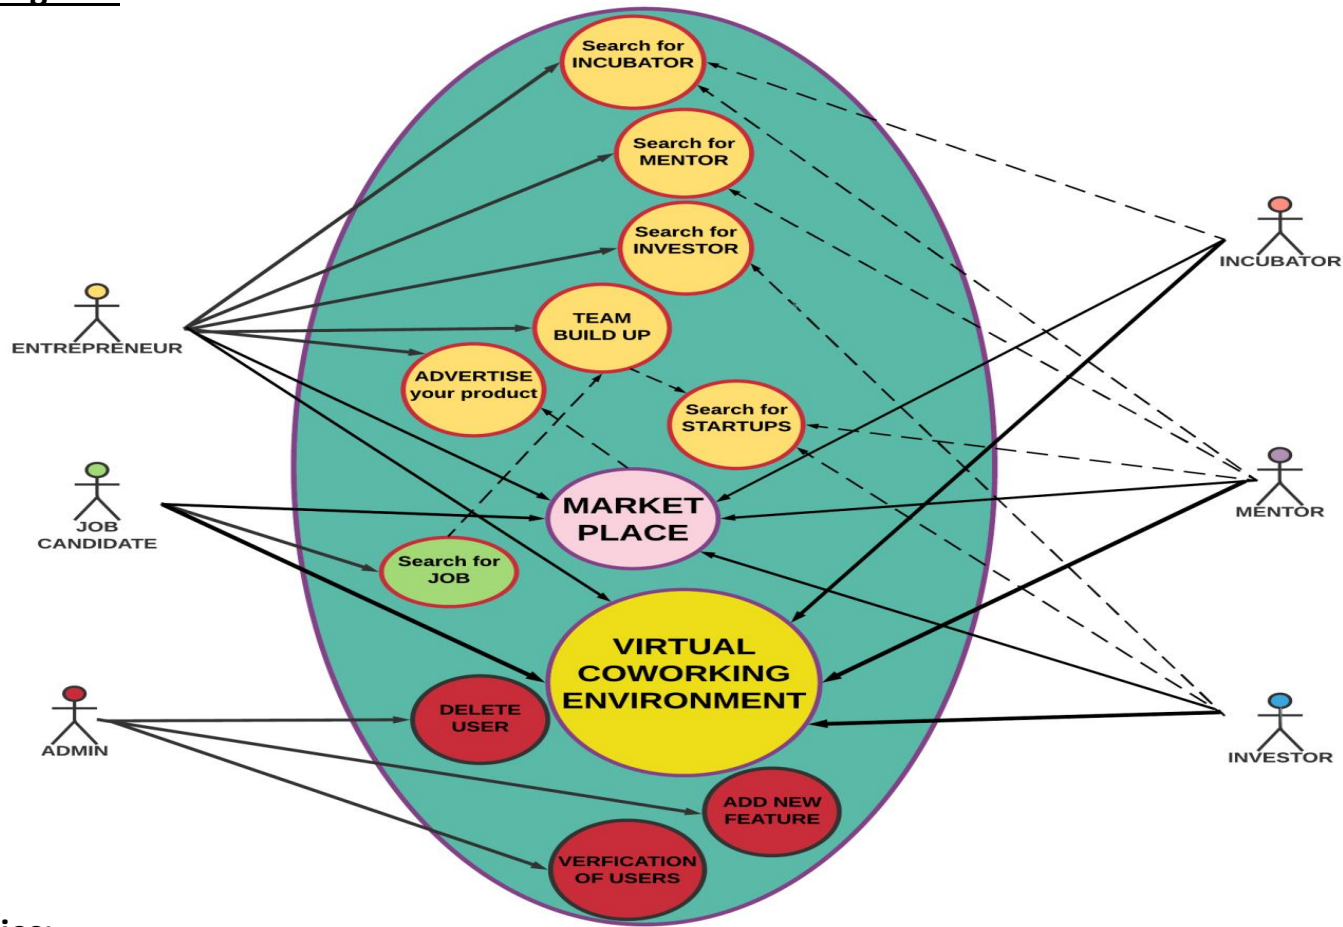

The website hosts a special portal dedicated for creating a virtual co working environment in which, real time problems are listed. A network has been setup such that a user can create/join a virtual team and start project dedicated on solving the problem, which can further be advanced to a startup or an open source project.

Our Website would be an advantage to entrepreneurs as it would provide all the services under one umbrella and attract investors to immense force of executives and founders.

Technology Stack:
•HTML, CSS, JavaScript for front end web design.
•Django framework used for back end web development.
•Bootstrap and W3-CSS used for accessing free collection of tools and assisting templates.
• Angular 4 used for enhancing search filters and sharpen web response.
•Photoshop used for design of logos and other user interface graphics.

Use case diagram:

Dependencies:

•Qualifications and certifications required by a job candidate looking for joining a startup team.`

• Mentors have to provide valid proofs of his/her specialization and qualifications for verification.

•Building/creating/access to a database of services being proposed

•The quality of incubators would be dependent on the quality of office space, mentors, expertise etc available in the area.

Show stopper:

The major appeal of the website is the virtual co working environment we are hosting which is dedicated for solving real time problems which are posted on the Network. Various projects can be initiated by the users linked to each other on this network. The projects can be further accelerated and implemented in real time.
